

# **Analysis on Global Financial development Dataset**

By Madhurika Situt

## **Background –**

The Global Financial Development Database is an extensive dataset of financial system characteristics for 203 economies.

## **Data Source-**

This data set is downloaded from <https://datacatalog.worldbank.org/dataset/global-financial-development>

This data contains financial report of 203 economies from 1960 to 2017

The database includes measures of:

1. Size of financial institutions and markets (financial depth)
2. Degree to which individuals can and do use financial services (access)
3. Efficiency of financial intermediaries and markets in intermediating resources and facilitating financial transactions (efficiency)
4. Stability of financial institutions and markets (stability).

CSV files

- GFDDCountry.csv
- GFDDCountry-Series.csv
- GFDDData.csv (around 25000 rows and around 60 column)
- GFDDFootNote.csv
- GFDDSeries.csv

## **Goal of analysis –**

Here, I am proposing of this dataset to perform analysis on

- financial growth of different economies in different year and to find any correlation between them.
- I intent to represent this growth in time series.
- To compare gross national income amongst all countries.
- To compare growth in finance along with population count.
